Core Skills: PMO Governance & Change Control | Project Leadership | Risk & Issue Management | Benefits Realisation | Product Lifecycle Management | Agile, Scrum & PRINCE2 Methodologies | Financial & Budget Control | Stakeholder & Vendor Management | Critical Path & Dependency Management

Technical Skills: MS Projects | ServiceNow | Jira & Confluence | Power BI | Enterprise Collaboration | SQL | Docker

PROFESSIONAL EXPERIENCE

Programme Co-ordinator • University of Salford **January 2025 - Present**
Supporting project and programme delivery across £4M+ digital transformation programmes impacting 25000+ staff and students managing end-to-end lifecycles including planning, risk management, and stakeholder engagement.

- Developed and implemented a comprehensive PMO reporting framework utilising ServiceNow and Power BI to govern a £4M+ digital transformation portfolio, delivering real-time visibility to executive leadership.
- Co-Orchestrated the end-to-end Business Readiness strategy for a core system transformation impacting 1,000+ academic and professional staff, bridging capability gaps and standardising communications to guarantee adoption.
- Monitored project tolerances, critical path dependencies, and interdependent workflows via MS Project across complex technology environments, ensuring deliverables had maximum traceability and met strict time, budget, and quality standards.

Technical Product Manager • Cutstruct Technology Limited (Techstars '23) **July 2023 - February 2024**
Provided comprehensive product management and delivery leadership during a crucial growth phase, managing the complete spectrum of product definition and execution. Established and governed the software delivery process.

- Led comprehensive user research to identify critical market gaps and launched a new retail service, driving a 30% increase in transaction volume and secured Techstars Toronto '23 accelerator acceptance and funding.
- Governed a £300,000 project budget and the end-to-end software delivery process, coordinating resource allocation and complex third-party integrations to meet strict investor milestones, cost and time tolerances.
- Managed external development partners and suppliers through a strategic core SaaS feature redesign that boosted daily user engagement by 25%, while enforcing cyber security standards, risk mitigation, and SOP compliance across the entire project lifecycle.

Product Manager • Decagon Institute **April 2022 - July 2023**
Led the end-to-end lifecycle for client-facing software projects developed by the agency.

- Managed the end-to-end lifecycle for a new B2B Marketplace tool from MVP to launch, aligning cross-functional teams with go-to-market strategies to capture a 12% market share and drive a 10% overall revenue increase.
- Led the end-to-end lifecycle for client-facing software projects operating within matrix-managed technology environments, seamlessly aligning internal resource availability and external stakeholders to ensure delivery.
- Engineered automated product performance dashboards using SQL to track 20+ key metrics in real-time, accelerating strategic decision-making and eliminating 6 hours of manual reporting per week.
